PROFILE

- Led the design, development, and restoration of over 60 impactful government websites, serving millions of users worldwide.
- A proven track record of 5+ years specializing in designing and developing projects spanning multiple industries: government, law enforcement, education, e-commerce, and automation.
- Combining design expertise with a strong development foundation, adept at thriving in collaborative cross-functional settings, dedicated to prioritizing user-centric design strategies and championing web accessibility initiatives.

EXPERIENCE

Web Designer ([GHD Digital](#))

📅 Nov 2021 – Jan 2023

📍 Waterloo, ON

- Developed over 60 new or existing websites with a strong focus on accessibility and pixel accuracy for public sector clients, including government, police, and museums. Responsible for complete front-end User Interface.
- Collaborated with cross-functional Agile teams, including UI/UX designers, project managers, and backend developers, to design dynamic, animatic, and responsive websites using HTML, SASS, and jQuery.
- Converted Adobe XD Designs to actual code keeping user experience in mind. Designed the user interface for mobile and tablet before implementing code.

UI/UX Designer ([Communitech](#))

📅 Jan 2021 – Jun 2021

📍 Kitchener, ON

- Worked with 12 clients in 6 months to help them take their business to the next level by improving their website's UI design and content structure.
- Designed user Interface and developed 9 attractive and responsive websites from scratch according to client requirements in a 4-week sprint for each project.
- Conducted user interface research and translated client requirements into user-friendly UI design using Adobe XD, collected user feedback, and enhanced user experience.

UI/UX Designer / Web Designer ([RidgeTech Automation](#))

📅 Jan 2020 – Apr 2020

📍 Cambridge, ON

- Transformed the outdated desktop-based ERP into a responsive, web-based, user-friendly platform, enabling access from any location or device.
- Engaged stakeholders to comprehend the limitations of the existing ERP and identify requirements for a more accessible and responsive solution.
- Designed a modern-looking and user-friendly User Interface using Figma. Assumed full responsibility for UI Design, and frontend development, seamlessly integrating backend data
